GREASE INJECTORS

Triad Products Company's Grease Injectors are very simple to use. Just attach to handheld grease gun and slip the stainless steel surgical needle under or through the bearing seal.

Ideal for getting lubrication to "hard to get at" points of friction.

A unique approach for prolonging the life of sealed bearings, Triad Products Grease Injectors have thousands of uses anywhere that sealed bearings are used.

Triad Part # 2001039
